

## KANSAS PUBLIC WATER SUPPLY SYSTEM - LEAD SERVICE LINE INVENTORY SPREADSHEET

### Item No. Description

- 1 When the Public Water System Data Collector (PWSDC) is available for uploading, additional system information will be associated with the LSLI spreadsheet
  - A. System Name
  - B. Person uploading data to
  - C. Date LSLI Uploaded
  - D. Is system CWS or NTNCWS
  - E. General Statement of Ownership of Service Lines -where ownership changes at meter or valve pit/curb stop, etc.
  - F. ???
  - G. ????
- 2 Water Systems are to fill in the columns highlighted in blues for each service line in their system to the best of their ability and available system information
- 3 General Column information can be seen by left clicking on the column heading
- 4  Cells highlighted in vibrant blue require data entry to be typed into cell
- 5  Columns highlighted in light blue require data entry by using call down list to ensure standard answers for auto-fill cells
- 6  Columns highlighted in yellow will auto-calculate based upon answers in blue columns
- 7 Water systems are identified by their unique 9-digit ID - Example: KS1234567
- 8 Addresses are required to locate and track individual service lines
- 9 Column "S" - Indicating if site will be used as a sample location will allow auto generation of Sample Site Plans
- 10

Kansas Lead Service Line Inventory Spreadsheet Instructions		
COLUMN	Column Header	DESCRIPTION
A	WATER SYSTEM ID NUMBER	<b>MANUALLY ENTERED BY SYSTEM</b> - This is your Federal I.D. Number. Example:KS123456
B	SYSTEM SPECIFIC ID	<b>MANUALLY ENTERED BY SYSTEM</b> -PWS can use this column to identify the site ID of lead and copper monitoring sites. This can be an identifier to match GIS Mapping, billing/account number or system created code.
C	SERVICE ADDRESS	<b>MANUALLY ENTERED BY SYSTEM</b> -Actual Street location address of service line. Not the billing address that may be a location other than service location.
D	WATER MAIN MATERIAL	<b>CALL-DOWN BOX SELECTED</b> - Material or composition of water main to which the service is connected
E	CONNECTOR OR GOOSENECK MATERIAL	<b>CALL-DOWN BOX SELECTED</b> - Material or composition of flexible connector between the water main and service line. May be a gooseneck, pigtail or flexible tubing to prevent shearing of connection or to change elevation between main and service.
F	WAS LEAD EVER UPSTREAM OF THIS SERVICE?	<b>CALL-DOWN BOX SELECTED</b> - Was lead piping ever located upstream of this service. This would include lead pipe that was removed during upgrades or main replacements.
G	PWS-OWNED SERVICE LINE MATERIAL	<b>CALL-DOWN BOX SELECTED</b> - What is material or composition of existing service line owned by the public water system?
H	WAS PWS-OWNED SERVICE LINE EVER LEAD?	<b>CALL-DOWN BOX SELECTED</b> - Was the public water supply owned service line ever lead? Even if the service line may have been replaced, it is important to know if lead was ever present due to affect on downstream private side piping.
I	PWS -OWNED SERVICE LINE SIZE	<b>CALL-DOWN BOX SELECTED</b> - What pipe size is the public water system owned service line? This may be used to determine water volume in service line if needed for Trigger Level/ALE investigation.
J	YEAR PWS-OWNED SERVICE LINE INSTALL DATE	This is the date that the public water supply service line was installed. Please enter the year of most recent install date if service line has been replaced. Example year: 1967 -If unknown Please enter UNKNOWN.
K	PRIVATE SIDE SERVICE LINE MATERIAL	<b>CALL-DOWN BOX SELECTED</b> - Material or composition of privately owned service line. This is required by the Rule.. PWS may need to observe line material in meter pit if possible or speak to resident about pipe entry into structure. Photos of service entrance may help identify piping
L	PRIVATE SIDE SERVICE LINE SIZE	<b>CALL-DOWN BOX SELECTED</b> - What pipe size is the privately owned service line? This may be used to determine water volume in service line if needed for Trigger Level/ALE investigation.
M	PRIVATE SIDE SERVICE LINE INSTALL DATE	This is the date that the privately owned service line was installed. Please enter the year of most recent install date if service line has been replaced. Example year: 1967 -If unknown Please enter UNKNOWN.
N	BUILDING TYPE	<b>CALL-DOWN BOX SELECTED</b> - The LCRR prioritizes community water systems to sample sites to single-family and multi-family residences with LSLs, GRRs and other representative sites. Non-transient, non-community systems may sample buildings with LSLs, GRRs and representative sites
O	POINT-OF-ENTRY OR POINT-OF-USE TREATMENT PRESENT?	<b>CALL-DOWN BOX SELECTED</b> - Is a point of use filter on faucet, RO undersink filter system or whole house water softener present? Examples: Water Softener, RO Unit, Carbon Canister on faucet, whole-house filtration/treatment, POU=Point of Use, POE=Point of Entry to Residence
P	STRUCTURE - PRIMARY PLUMBING MATERIAL 1	<b>CALL-DOWN BOX SELECTED</b> - What is the most common piping material in structure? This may be original piping like copper pipe with lead-solder, galvanized or in newer structures this may be PEX pipe or PVC

Q	STRUCTURE SECONDARY PLUMBING MATERIAL 2	<b>CALL-DOWN BOX SELECTED</b> -What is the second most common piping material in structure? This may be piping like copper pipe with or without lead-solder, galvanized or in newer structures this may be PEX pipe or PVC
R	YEAR (RANGE) STRUCTURE PLUMBING MATERIAL INSTALLED	<b>CALL-DOWN BOX SELECTED</b> - Usually will be the year the structure (residence or building) was built. However, if structure was re-plumbed, please use that date. Year ranges represent the regulation dates on the use of lead in plumbing.
S	THIS LOCATION WILL BE USED FOR LEAD AND COPPER SAMPLE SITE PLAN?	<b>CALL-DOWN BOX SELECTED</b> - Will your system use this location as a Lead and Copper sample site?
T	REPLACE GOOSENECK/PIGTAIL CONNECTOR	<b>AUTOMATICALLY CALCULATED CELL</b> -Is the connector (gooseneck/pigtail) required to be removed when encountered or when service line is replaced?
U	LSL CATEGORY IN INVENTORY	<b>AUTOMATICALLY CALCULATED CELL</b> -Each service line, considering all portions of the service line where ownership is split, must be categorized as either: 1. Lead 2. Galvanized requiring replacement 3. Non-lead 4. Lead status "unknown" will be considered lead by Rule
V	SAMPLE SITE SELECTION CRITERIA (SITE TIER)	<b>AUTOMATICALLY CALCULATED CELL</b> -Water systems with LSLs are required to collect samples from all LSL sites (Tier 1 and 2) unless there is an insufficient number. In those cases, the water system must use Tier 3, 4, or 5 sites, in that order.
W	Would this count as full LSLR if Lead is removed?	<b>AUTOMATICALLY CALCULATED CELL</b> -Replacement of a lead service line (as well as galvanized service lines requiring replacement), that results in the entire length of the service line being lead free.
X	REQUIRES RESIDENT NOTIFICATION IF LSL DISTURBED	<b>AUTOMATICALLY CALCULATED CELL</b> -Water systems that cause disturbance to a lead, galvanized requiring replacement, or lead status unknown service line must provide resident information to reduce lead exposure.
Y	REQUIRES RISK MITIGATION (POU OR PITCHER FILTER)	<b>AUTOMATICALLY CALCULATED CELL</b> -PWS must provide residents a "POU" or "pitcher filter" certified by the American National Standards Institute to remove lead from drinking water
Z	SOURCE OF INFORMATION USED SERVICE LINE IDENTIFICATION	<b>MANUALLY ENTERED BY SYSTEM</b> -What information was used to identify the service line material? (Construction Drawings, Building Codes, Excavation, System Records, etc.) This information may become important to prioritized line replacement.
